The annual IDEAS conference is a top international forum for data engineering researchers, practitioners, developers, and application users to explore revolutionary ideas and results, and to exchange techniques, tools, and experiences. We invite participation of all interested in this meeting which provides an insight into original research contributions relating to all aspects of database engineering defined broadly, and particularly topics of emerging interest describing work on integrating new technologies into products and applications, on experiences with existing and novel techniques, and on the identification of unsolved challenges.

The following tracks is currently in place:  
Cybersecurity of Critical Infrastructure, Hoda Mehrpouyan,  
Boise State University, USA

All paper submission for IDEAS'2020 would be via the corresponding pages on ConfSys. Authors should sign up at:
